**PE UD fabric, also known as PE weft free fabric, is a bulletproof material with the highest strength and lightest specific gravity, which is made by using ultra-high molecular weight polyethylene fibers as the substrate, impregnating high-strength elastic resin through equipment stretching, and bonding with the film.**

**UHMWPE is one of the world's three high-tech fibers (carbon aramid fiber and ultra-high molecular weight polyethylene fiber) and the toughest fiber in the world. It is light and thin like hair, hard as steel and 15 times stronger than steel.**
